VIDEO RECORDING GUIDE

WHAT IS YOUR VIDEO?

Your video entry is your way of saying that you would like your team to be put into the judging of the Hackathon; if you don't want your solution to be judged then you don't have to submit a video. The judges will watch each teams video and use that to fill in a marking criteria sheet.

VIDEO INFORMATION

STYLE

Your video should consist of some form of slide deck and a demo. The slide deck should explain the challenge you went for, the value in solving this challenge and how you went about solving it. The demo should be the show and tell part of the video explaining the solution you created and how it works.

You should use your slide deck and demo as the screen being recorded and speak over these as if you are presenting.

LENGTH

In order to get through the judging in a timely manner we ask that videos be no longer than 2 minutes – videos that come under this limit are completely fine but ones that exceed this by a 10% margin will not be judged.

JUDGING CRITERIA

Your solution will be judged based on the following:

1. Technical Complexity
2. Originality
3. Meets the criteria
4. Challenges while developing
5. Team dynamic

Try to touch on all of these points during your presentation to stand the best chance during judging.

SAVE FORMAT

You should submit your video in MP3 Format and use a screen recording tool to record your PowerPoint and demo.

For MacOS we recommend Quick Time's screen record functionality.

For Windows we recommend PowerPoint's inbuilt screen recording or for Windows10 users the screen recorder within the game bar (Windows key + G)

Uploading

Video's should be saved and uploaded to the shared Google Drive using the link below. Videos can be seen by other teams and this is to make everyone's solutions open to all attendees. Videos will also be shown on the Sunday to allow attendees to view other team's solutions.

File name should be: TEAM_NAME_Datathon.MP3

If you are entering the Techstart Grant it should be: TEAM_NAME_Datathon_Techstart.MP3
